

TALENT ACQUISITION

We work as an extension of your team, using your company name and brand standards. Our services start with a kick-off strategy meeting to understand your company, the position, and success factors for your unique culture and needs. The search will be managed using web-based applicant tracking software that efficiently tracks, shares, and communicates with every candidate that applies to your open position. The combination of our approach and the software provides the foundation of a great hiring experience for both the hiring manager and the candidates, ensuring you build your best team.

When you work with HR Solutions Group, candidates are strategically and exclusively sourced for your company. Our scope of services can range from the complete hiring process to just portions of the process, depending on your needs.

OUR PROCESS
